AS 9100D Compliant Company

Purchasing Process: Terms & Conditions, Form: C2F2 Rev. 1

This document, purchasing Terms & Conditions shall be considered as an addendum to Center-Line Machining (The Company) Purchase Order document if and when the following statement “**Subject to Terms & Conditions Form C2F2 Rev. 1**” appears on the Purchase Order.

Terms & Conditions

1. All purchases by Center-Line Machining from your company (the supplier/seller) shall be subject to verification (incoming inspection). If nonconformity is detected during the incoming inspection, purchased product may be subject to immediate return to you the supplier, with the appropriate Corrective Action Request Form (CAR). All CARs must be completed and returned to Center-Line Machining’s Quality Coordinator within 10 days.
2. Verification activity may include:
 - a) Obtaining objective evidence of quality – test reports, certifications.
 - b) Audit and inspection at supplier’s premises.
 - c) Review of required documentation.
 - d) Inspection of product upon receipt, including delivery on time.
 - e) Delegation of verification to the supplier or supplier certification.
3. All suppliers shall be subject to the annual performance review, and shall be notified if and when they have been dismissed as a preferred supplier to Center-Line Machining.
4. All suppliers should carefully review our Purchase Order for the following:
 - a) Requirements for approval of product, procedures, processes and equipment.
 - b) Requirements for qualification of personnel.
 - c) Quality Management System requirements and Regulatory requirements.
 - d) Name or other positive identification – specifications, inspection instructions.
 - e) Requirements for test, examination, inspection, and related instructions regarding acceptance by Center-Line Machining.
 - f) Requirements for test specimens, for design approval, inspection, or auditing,
 - g) Requirements relative to notification to Center-Line Machining of nonconforming product and Center-Line Machining’s approval of nonconforming product.
 - h) Requirements to notify Center-Line Machining of changes in product and/or process definition previously successfully utilized and agreed on, and, where required, obtain Company’s approval.
 - i) Supplier shall give the right of access to Center-Line Machining, their customer, and regulatory authorities to all facilities involved in the order and to all applicable records generated by such order. Records shall be filed under Center-Line Machining’s name and record retention shall be no less than 7 years unless otherwise specified.
 - j) It shall be the supplier’s responsibility to flow down to sub-tier suppliers (your supplier) the applicable requirements in our Purchase Order document and in this document, including any key characteristics where required.
5. Center-Line Machining shall periodically validate test reports and certificates for accuracy.
6. When Center-Line Machining delegates verification activities to the supplier on the purchase order, the requirements for delegation shall be defined and a register of delegations noted and maintained.
7. When Center-Line Machining or its customer intends to perform verification at the supplier’s premises, Center-Line Machining shall state the intended verification arrangements and method of product release in its purchase order.
8. When specified in the purchase order, Center-Line Machining’s representative shall be awarded the right to verify at the supplier’s premises. That the subcontracted product conforms to specified requirements.

9. Material supplied against this contract must be purchased from approved sources of the end item users (Center-Line Machining). Conformance to our "Counterfeit" policy must be ensured.

10. Latest Revisions: The product being manufactured and/or service being performed must be completed per the latest revision. At no time will other revisions be used other than what is indicated on the drawing or purchase order, without the express written permission of an authorized representative of Center-Line Machining.

11. Control of nonconforming product: Nonconforming product produced by your company. Any supplied material will be segregated, tagged and returned to Center-Line Machining along with completed internal non-conformance report. Documented cause and corrective action are required.

12. All suppliers shall use appropriate methods of handling, packaging and preservation of product(s) to prevent damage of said product at all times.

13. Product certification: Seller/Suppliers shall certify that all parts which are supplied conform to purchase order requirements, applicable specifications, finished, dimensions, etc. and records are on file subject to examinations by Center-Line Machining.

14. Certificate of Compliance shall accompany all shipments as required by the Purchase Order. The certificate of compliance must be signed by an authorized representative and reflect all information necessary to identify the product, quantity, current revision, and whatever services and or processes you (the supplier) have performed. All documents must be 100% legible.

15. Traceability / Lot Shipment Requirements: lots and/or batches shall not be commingled.

- A casting, forging, machined part or stamping lot/batch consists of the same part number, of one alloy, produced using the same processing parameters (including heat treat) and contains a homogeneous heat pour, or same basic material.
- A production lot/batch shall consist of parts that are all the same configuration fabricated under same conditions, from the same material type, processed together and produced as one continuous run.
- A plating lot/batch (cadmium, anodize, chemical milling, etc.) shall consist of treated articles on the same order, treated under same conditions, from the same chemical composition, from the same tank.
- A coating lot/batch (paint, dry film lube, etc.) shall be processed as one batch, on the same part, on the same order. A batch is defined as the end product of all the raw materials mixed or blended in a single or continuous operation and typically contained, (in bins, baskets, crates etc.) shipped and tagged as a specific entity.
- All bins/baskets/batches/lots of parts received from Center-Line Machining. for processing shall maintain their respective tags and labels identification throughout processing.

16. Product Verification: Verification (inspection) by Center-Line Machining. shall not absolve the seller/supplier of the responsibility to provide acceptable product, nor shall it preclude subsequent rejection by the Company. The Company shall do its due diligence to inspect for Counterfeit parts.

17. FOD – Foreign Object Detection: The Seller/Supplier shall ensure that Foreign Object Damage/Debris control process is a part of their final inspection methodology, assuring Center-Line Machining. that work is accomplished in a manner preventing foreign objects or material from entering and remaining in the deliverable items. Maintenance of the work area and control of tools, parts, and materials will preclude the risk of FOD incidents.

These Terms & Conditions are subject to modification as per Center-Line Machining. requirements and the requirements of ISO 9001:2015 and the AS9100D International Standard which harmonized, to the greatest extent possible, quality management system requirements for Aviation, Space and Defense Industries, for the purpose of improved quality, decreasing costs, and improving safety in design & function of U.S military aircraft, defense & space technologies and commercial Airline services. Any and all revisions to Center-Line Machining. terms and conditions may be found at www.clmachining.com
